

No sales to those under 18

This is already the law in 48 states, but the FDA regulation adds a new requirement — anyone appearing under the age of 27 must present photo identification.

Age verification for online sales

In both the final rule and in webinars, the FDA has announced its intention to conduct youth access checks on not just brick-and-mortar retailers, but also online retailers. It is critical that retailers only sell online if they have integrated into their website an adequate age verification platform. (Simply clicking a box is not acceptable.)

AGE REQUIREMENTS

Innevape has taken the steps to provide this adequate age verification process. We have now integrated BlueCheck into our online store. Electronic Cigarettes and E-Liquids are intended for use by persons 18 years of age or older ONLY. By participating in the age verification process from BlueCheck, during checkout with Innevape, you will be able to continue shopping with Innevape and other sites that utilize BlueCheck Age Verification. While this may seem like a tedious process, it is necessary to continue to purchase eLiquids online. Without approval from BlueCheck individuals will no longer be able to shop in our online environment. Any account found to be

created with or using false or fraudulent information may be subject to prosecution.

WARNING: This product is not intended for use by persons under legal smoking age, nonsmokers, women who are pregnant or breastfeeding, or persons with or at risk of heart disease, high blood pressure, diabetes, or taking medicine for depression or asthma. This product contains nicotine. If you are allergic to nicotine, propylene glycol, or any combination of inhalants, if you are pregnant or breastfeeding, or if you have a heart condition, diabetes, high blood pressure or asthma, consult your physician before using any electronic cigarette products.

CALIFORNIA PROPOSITION 65 Warning: This product contains nicotine, a chemical known to the state of California to cause birth defects or other reproductive harm.
